

Meeting - 8 June 2010

theoretical needs are either phenomenal or object driven
the reason a science dies is because there are no questions

Begin

Discuss the development and transition to screens (including urban screens)
how to justify the discussion of the screen: other academic authors, non-academic authors,
or statistics

Theories

double-logic of remediation
manovich's key point is that the old media forms are reconfigured as inputs to new media
as well as outputs
one could theorize the screen according to remediation or via manovich
what are the input forms/output forms of the screen
do our cases confirm, disconfirm, or disrupt these theories?

Historiographical Approaches
