

Phillips

Manovich is wrong. New media should be considered a layer. That layer can be conceived as the point of tension between hypermediation and immediacy.

What's cool about Lev is that he gave a point to give counterpoints. The window.

Hansen. -> another good look. o

New media theory: what is it capable of? what is it useful for?

The Disk Analyzer - Cairo based. Memory visualization.

freesouls.cc

Linus is the stable layer of the internet.

jacob applebaum - knuth shirt

tommy the clown - crump dance.

laser - leonardo art and science evening rendezvous.
